## Injured Innocence

Receiver Frank L. Wildes of the long defunct State Bank and Trust company, through an announcement in one of the Carson dailies, declares that he will welcome an investigation of his office by the senate investigating committee. At the same time he announces that he does not recognize the right of the legislature to order an investigation of his affairs. The grace with which Wildes submits to the inevitable is not in keeping with his statement, and it is apparent that the dignity of the receiver is somewhat ruffled over the unexpected turn of affairs.

Wildes does not realize that hundreds of depositors of the State bank, whose funds have long been in his keeping, have been praying for years that they might be informed of the status of the bank's conditions and of the chance they stand in securing dividends. The requests for information have not been forthcoming, for to the contrary, it appears that every endeavor has been made to keep the creditors of the institution in ignorance as to the true state of affairs.

Wildes declares that he has submitted 18 reports, covering in detail the work he has accomplished, but does not state that not a single report has been mailed to the bank's depositors. He makes no mention in his letter to the Carson press of the first report filed with Judge Langan; of the subsequent printing of this report, the expense of printing being paid by the depositors—and then of the mysterious disappearance of the entire batch of reports, with the exception of two which found their way into the hands of others.

Several months after the reports were printed and delivered to the receiver the fact became known and an attempt was made by the writer to secure a copy. A trip was made to Carson for that purpose, but owing to the absence of Wildes, who was in San Francisco or Los Angeles, the request was made of Cashier Davis, the assistant of Wildes. Davis refused to furnish a copy of the report without an order from Wildes. He even stated that he would not comply with a telegraphic order from Judge Langan. However, a change in mind must have been experienced, for on the following day one of the copies arrived in Reno, having been mailed by Wildes. The secrecy with which the reports were guarded caused considerable comment, and not long afterwards it was rumored that the entire lot of reports had been destroyed by Wildes or his assistant. The truth of the rumor could never be verified, but it is known that the documents were not submitted to the depositors.

The subsequent reports filed by Wildes are merely a jumble of figures. Perhaps they might be deciphered by an expert accountant, but the mass of figures means absolutely nothing to the hundreds of depositors who have not been so fortunate as to have enjoyed a commercial education. And in this wise Wildes pleads that he has done his duty in every respect. His initial report was compiled in such a manner as to be intelligible to all, but the subsequent reports appeared to have been formed with the sole idea of keeping the real facts from the depositors.

Wildes in his reports does not set forth the amounts expended for his salary, his traveling allowances, the salary of his "cashier," or the expense incurred by the employment of attorneys to prosecute suits filed by the receiver against debtors of the bank. It is such figures as these that the depositors would appreciate, for an inkling could be had of the manner in which the business was conducted.

Regarding the application of Wildes for his salary, which hearing was concluded several weeks ago and submitted to Judge Langan for decision, the receiver declares that he has "produced capable witnesses to testify to the salary that should be paid one filling the duties as I have, and this testimony is on hand to be shown to the proper parties." If Wildes desires a little expert testimony as to his capabilities we would request that he secure the opinion of the editor of the Bonanza and likewise the editor of the Goldfield Tribune. Who the witnesses were he produced before the court, we are unaware. It is safe to assume that the witnesses were of the same opinion of Wildes, else the receiver would have requested them to testify on his account.

There are a number of bank officials in Nevada who are qualified to testify in such a case and testimony elicited from this source would be unbiased. We have not heard of Wildes asking such bank officials to give their opinion, nor have we heard anything of the decision of Judge Langan regarding the salary allowance. The meager sum of \$10,000 has been paid Wildes annually, since he was appointed as bank receiver by Langan. This, however, does not include traveling expenses nor the salary of his \$3000 assistant. It is due to the exorbitant salary that the senate investigating committee was appointed, with the recommendation their report contain reference to a suitable salary for the receiver.

The fiasco of Wildes' incumbency in the affairs of the State Bank and Trust company has been such that outside states took with disfavor upon the banking conditions in Nevada. Every effort was made to remedy the existing unsatisfactory conditions by the legislature two years ago which passed a banking bill making the bank examiner the receiver of every defunct bank. Through the actions of Wildes, the legality of the law was contested and the supreme court declared the act unconstitutional. Had Wildes the interests of the depositors of the bank at heart, instead of the \$10,000 salary, the affairs of the State bank would be in the hands of the bank receiver today, and the enormous expense would not be piling up monthly. An instance of the efficiency of the bank examiner is shown in the recent report wherein the affairs of the Bullfrog bank were liquidated at a total cost not exceeding \$2500. Compare the record of Wildes with the record of Clay Tallman, who acted as trustee in the latter case, and observe wherein the interests of the depositors have been protected.

In concluding his message to the public Wildes declares: While I do not recognize the right of a legislative body to inquire into this matter, I have at all times solicited inquiry and advice from any and all sources and I gladly seize the opportunities afforded me to explain this matter for the benefit of all concerned.

The meaning in the statement that he does not recognize the rights of the legislative body are not clear, but for the sake of the receiver the Bonanza earnestly recommends him to pay just a little attention to the committee, for there is more power vested in the members than he may realize.
